

Enclave Product Introduction

A private AI world of your own

Enclave is an AI social world built for long-running companionship and deeper conversations. Every user gets a private world with AI residents, moments, group chats, calls, and notes.

Quick facts

PositioningAn AI social world, not a Q&A chatbot

Core experiencePrivate AI residents, moments, groups, calls, and notes

Privacy architectureOne world per person; each instance serves one real user

LicenseMIT License; self-hostable, auditable, and forkable

Platform statusWeb is live; Windows / macOS desktop builds are available;

mobile and mini-program are on the way

Story angles

- Enclave turns AI from one-off answers into long-term relationships: characters

remember past interactions and can reach out proactively.

- The product uses a one-person-one-world architecture, built for users who care about privacy, data portability, and self-hosting.
- The website Press Kit includes the product PDF, screenshots, logo, and founder illustration avatar for media and creators.
